SEAMLESS COLLECTION™

Engineered posts, timbers and boards by CureWood

CUREWOOD
ENGINEERED BUILDING PRODUCTS

OUR PURPOSE

Solid-timber appearance. Engineered consistency.

CUREWOOD
ENGINEERED BUILDING PRODUCTS

At CureWood, we believe the future of construction is in complete solutions — not just raw materials.

We develop engineered wood products that preserve the beauty, warmth and presence of solid timber, while improving the consistency, performance and efficiency behind it.

Our goal is simple: turn the fibre available to us into the products and solutions the market needs — thoughtful building systems designed to make better use of wood and perform for generations.

Ben McKinnon, President

One collection. Three constructions.

Three engineered constructions, each designed to deliver the right balance of strength, stability, appearance and value for the application.

CONSTRUCTION 01

HOLLOW-CORE

The look and strength of a solid sawn timber with less weight, improved stability, and a seamless finished appearance.

USE FOR

Structural and appearance posts for vertical applications

CONSTRUCTION 02

SOLID LAMINATED

Solid wood performance with engineered stability—built to be stable and more consistent than conventional solid-sawn posts.

USE FOR

Structural and appearance posts where a solid section or enhanced fire performance is preferred

CONSTRUCTION 03

FJ EDGE-GLUED

Long, straight boards engineered for a consistent appearance, reliable dimensions and efficient installation.

USE FOR

Fascia, trim, siding, and beam wraps

Built with control. Backed with confidence.

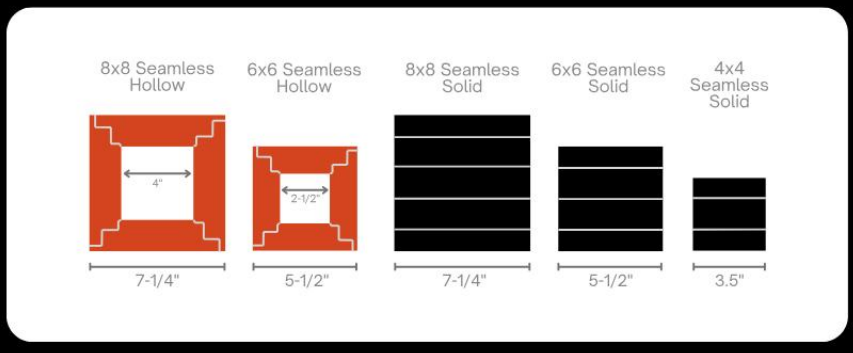

PRODUCT FAMILY

Seamless Coastal Cedar™

Bold Timbers, Reliable Supply

Delivering the strength, beauty, and reliability once associated with big Coastal Cedar Timbers, using responsibly sourced fiber that will be available for generations to come.

Seamless Coastal Cedar Timbers™

Stop wrestling with solid wood timbers — the culls, the callbacks, the lengths nobody buys. Seamless timbers are stocked only in the prime lengths and finishes that actually sell, so every piece leaves your yard with confidence.

For exposed or stained applications where a seamless, color-matched look matters, choose Hollow-Core. When the job calls for the characteristics of solid timber, choose Solid Laminated — higher strength with premium dimensional stability.

HOLLOW-CORE

SIZES	6x6, 8x8
LENGTH	06' 08' 09' 10' 12'

SOLID LAMINATED

SIZES	4x4, 4x6, 6x6, 4x8, 8x8
LENGTH	06' 08' 09' 10' 12' 16' 20'

QUALITY & SPECIES	Tight-Knot WRC (Western Red Cedar)
SURFACES	S4S / COMBED / RESAWN
FINISH	Raw WRC, Primed-Grey

Seamless™ Cedar Boards

Seamless™ engineered cedar boards give you the natural beauty of Western Red Cedar without the headaches. Finger-jointed and edge-glued from tight-knot stock, they stay straight, resist warping and checking, and come in long, clean lengths. Fewer joints, fewer callbacks, and a board that finishes beautifully every time.

FJ EDGE-GLUED CONSTRUCTION

Long lengths.
Broad widths.
Reliable supply.

Boards

2-1/2" to 15-1/4"

Bevel

3-1/2" to 9-1/2"

Channel

3-1/2" to 9-1/2"

Cedar board availability

Cedar boards typically come in knotty tight knot grades of western red cedar - clear grades can be produced upon request.

DETAILS & OPTIONS	
1x4	16' / 20'
1x6	16' / 20'
1x8	16' / 20'
1x10	16' / 20'
1x16 BEAM COVERS	16' / 20'

DETAILS & OPTIONS	
THICKNESS	1/2" TO 7/8"
SURFACE	S4S / RH / RESAWN
GRAIN ORIENTATION	MIXED GRAIN
FINISH	RAW / PRIMED

S4S

ROUGH

RESAWN

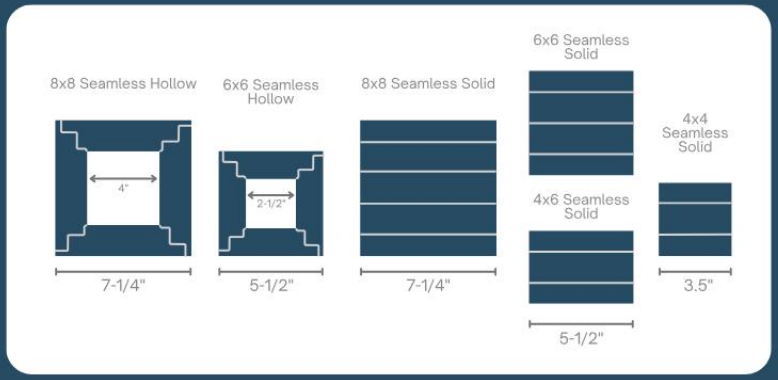

PRODUCT FAMILY

Seamless Fascia Post™

Faster Install, Cleaner Finish, Lower Cost

Factory-finished SPF posts that replace the time, labour and variability of site-wrapped columns.

Seamless Fascia Post™

Skip the complex site-wrapped column assemblies. The Seamless Fascia Post is install-ready, sealed, and more stable — at a fraction of the cost. No more wrapping, no more cladding: just install and paint.

Go hollow-core for a fast, easy install — its built-in utility channel gives wiring a clean, hidden path through the post. Choose solid laminated when the job calls for solid timber, premium dimensional stability, and great fire performance.

HOLLOW-CORE

SIZES	6x6, 8x8
LENGTH	08' 09' 10' 12'
WORKABILITY ON SITE	HIGH

SOLID LAMINATED

SIZES	4x4, 4x6, 6x6, 4x8, 8x8
LENGTH	08' 09' 10' 12' 16' 20'
FIRE PERFORMANCE	HIGH

QUALITY & SPECIES	Tight-Knot SPF (Spruce-Pine-Fir)
MOISTURE	Kiln Dried (HT) 19% MC
SURFACES	S4S / COMBED / RESAWN
FINISH	Primed-Grey, Primed-Cedar Tone Brown

PRODUCT FAMILY

Seamless KD Douglas-fir™

Kiln dried deeper. Engineered to stay that way.

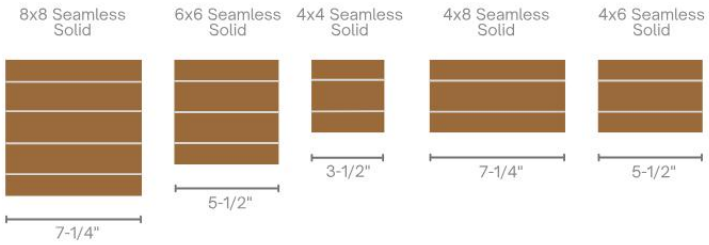

Seamless KD Douglas-fir™ combines the strength and beauty of Douglas-fir with the stability of solid laminated construction.

Dried to 14% moisture content throughout the full section, the post has no wet core or major moisture differential left to drive shrinkage, checking or movement after installation.

The result is a strong, consistent timber built to stay straighter, tighter and more predictable in service

PRODUCT RANGE	
QUALITY & SPECIES	Tight-knot Douglas-fir
MOISTURE CONTENT	Kiln Dried (HT) 14% MC
SIZES	4x4 through 8x8
LENGTHS	8' / 9' / 10' / 12'
CONSTRUCTION	Solid
SURFACE	S4S / COMBED / RESAWN
FINISH	Primed-Grey, Raw Douglas-fir

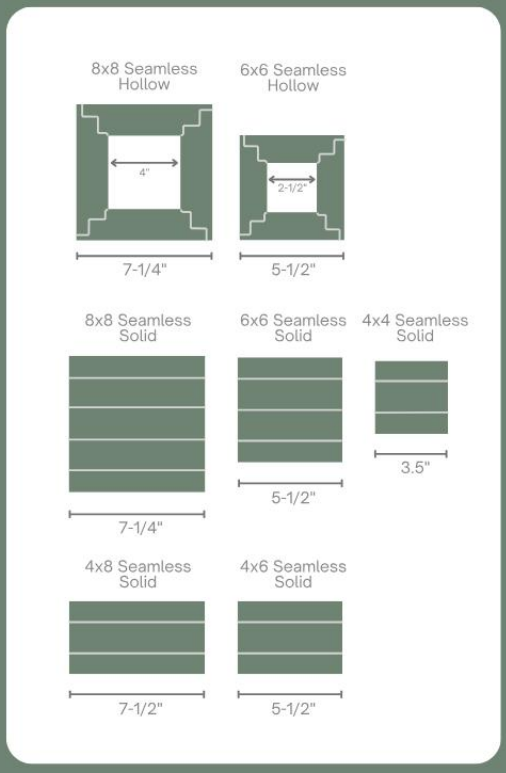

PRODUCT FAMILY

Seamless Pressure Treated™

Just when you thought Seamless™ couldn't get any tougher.

Seamless™ Pressure Treated combines the stability and consistency of our engineered post construction with the proven protection of Copper Azole treatment.

Built for demanding exterior applications, Copper Azole treatment helps protect against rot, decay and termite attack, while Tanatone brown delivers a warm, natural wood appearance — added durability and curb appeal, all in one.

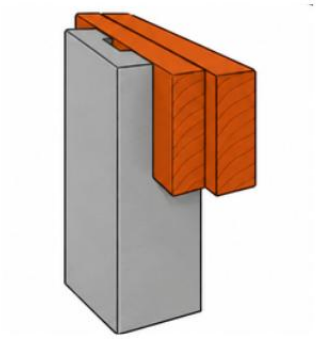

PRODUCT RANGE	
SPECIES	Western Species
SIZES	4x4 through 8x8
LENGTHS	8' / 9' / 10' / 12'
SURFACE	S4S / RESAWN
TREATMENT	Copper Azole (CA) + Tanatone

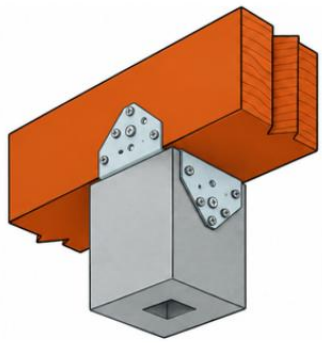

Designed to Connect

Seamless™ Posts are engineered building components designed to integrate cleanly with a wide range of common post-to-structure and post-to-foundation connections. Shown below are typical applications demonstrating how Seamless™ Posts can be detailed using widely available structural hardware solutions.

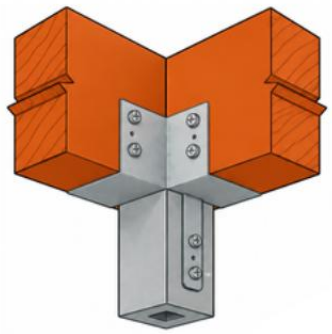

NOTCHED BEAM

Field-notched connection to beam

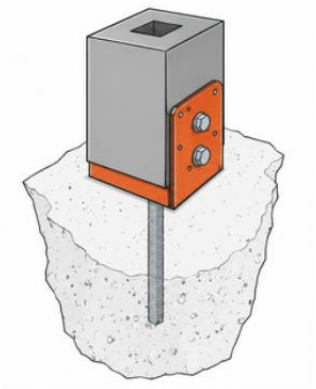

POST CAP

Surface-mounted post-to-beam hardware

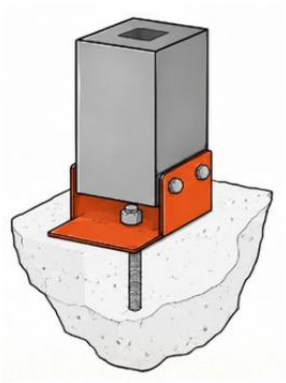

CORNER CAP

Corner condition, multi-directional load transfer

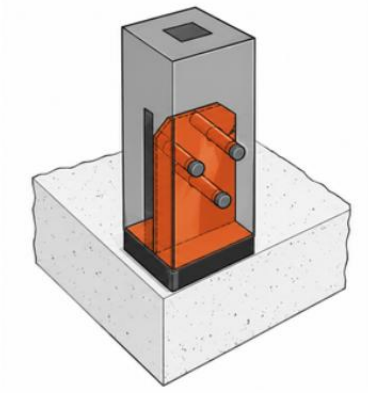

ELEVATED BASE

Raised post base for drainage clearance

CONCEALED BASE

Hidden hardware with uplift resistance

KNIFE PLATE

Embedded steel plate with concealed fasteners

Proper handling, moisture management, fastening, and finishing are required to achieve long-term performance and maintain warranty coverage. For complete installation requirements and approved details, please visit CureWood.co
